DETAILED ACTION

Allowable Subject Matter

1. Claims 1-50 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art made of record does not teach a system/method for sensing motor current from a three-phase motor comprising a first circuit, which generates a first current that is proportional to the difference between a reference voltage and a voltage across a first resistor that is connected between a first switch of a first leg of a three-phase motor and a power supply voltage when the first switch is active, and proportional to the reference voltage when the switch is inactive; the first circuit also generates a second lower current proportional to the sum of a second reference voltage and the voltage across a second resistor connected between a second switch of the first leg of the inverter and ground when the second switch is active and proportional to the second reference voltage when the second switch is inactive.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rina I. Duda whose telephone number is 571-272-2062.
